## REFERENCE LETTER

KRAFT company specializes in industrial electrical installations in south-western Poland since 2000. Our clients value our company mainly for responsibility, high standard and timeliness of our orders. We needed a solid and reliable supplier of industrial luminaires to meet the quality requirements of our customers in terms of LED lighting. We chose LEDIKO company. We have been implementing lighting systems equipped with LED luminaires and with the control automatics additionally maximizing energy efficiency in cooperation with LEDIKO for many years. We delivered large industrial enterprises such as:

- HFG Opole (metal industry)
- KAMEX Opole (metal and mining industry)
- FAMET Opole Metalchem (metal industry)

On the basis of the cooperation with the company to date, we can definitely recommend LEDIKO, as the supplier of LED industrial luminaires for demanding customers. LEDIKO rises to the challenge at the stage of investment preparation as well as at the stage of installation service. LED luminaires were supplied according to the construction schedule. All the required standards are fulfilled as intended. In case of unusual tasks, such as fitting the crane luminaires or under the shade outside, the products have been also tested. After-sales service is at a good level. The company responds quickly and with commitment. Our customers are satisfied with the installed lighting systems. They draw significant advantages on energy savings and lighting services. We have the knowledge that if they wanted to expand their facilities they would like us to use LEDIKO luminaires. In summarizing our cooperation with LEDIKO over the years, I recommend this supplier and LEDIKO luminaires especially for demanding industrial applications.
