Reference letter

We hereby inform that Lediko Sp z o.o. has designed LED lighting system for our production hall: *Casting Aluminum in Skawina* (Poland). The project has been prepared according to specific conditions i.e. ambient temperature of +45°C as well as a high level of dustiness.

Based on prepared LED Lighting Project the decision to assembly 4 pcs. of Lediko Inlene Luminaires for a pilot project was taken. The luminaires were mounted in April, 2015.

After positive results of luminaires testing and successful verification of the offered solutions, Nicromet has decided to implement LED lighting system of Lediko Sp. z o.o in our production halls.

Lediko proved to be a reliable partner, employees demonstrated professionalism and the product met our high expectations of quality.

We recommend Lediko Sp z o.o. as a reliable partner in a designing, manufacturing and implementing of lighting systems with LED technology. Calculated savings has shown that the expected return of investment is within 12 months from the date of installation of Inlene luminaires.
